SAVING YOU MONEY WITH THE RIGHT FASTENER

Würth Adams offers design and engineering services as a value added resource to meet the increasing demands of your manufacturing business. Increase your profits and eliminate excess costs by involving Würth Adams through out your entire production process.

Concept and Development

Würth Adams will assist in approach.

Prototype or Research and Development

Würth Adams will supply samples and assist in lot development.

Production

Würth Adams will observe assembly and installation.

Post Production

Würth Adams will provide product tear down and product analysis.

Let Würth Adams be your engineering resource for all your fastener needs. For a FREE consultation, contact your Würth Adams representative.

COST SAVING EXAMPLES

Reduce Your Assembly Costs

Slide tube clip snaps into position clamping on copper tubing through HVAC units. This eliminated secondary machining operations and sped up assembly.

Cost Reduction of \$680,000

Consolidate Your Inventory

Consolidation of five different miscellaneous bolts into one type of bolt for fastening pumps.

Cost Reduction of \$41,000

Increase Your Production Speed

A stamped u-clip that is pre-assembled to wire made it easier to fasten wires to an AC/DC power pack unit.

Cost Reduction of \$290,000

Improve Your Product Design

Crimptite threadformer allowed for use of thinner sheet metal, original screws would not function in thin material.

Cost Reduction of \$475,000
